

**NORDSYN JUNE 2016**

Commercial local space heaters with a nominal heat output ≤ 120 kW are covered by ecodesign requirements according to Regulation (EU) No 2015/1188.

The requirements apply to commercial local space heaters as described in Article 1 and 2 of the above mentioned Regulation.

The documentation shall be produced before the product is placed on the market or put into service. The technical documentation shall be sufficient to enable assessment of the conformity of the product with the requirements. In this respect it is important that test reports are included in the technical documentation.

Commercial local space heaters

This guide presents the technical documentation that you have to provide if the market surveillance authorities ask for it. There are however other information requirements and requirements on web-information that you always need to fulfil according to the regulations.

Technical documentation for commercial local space heaters

Demands	How to comply
Name and address of supplier	Company name and complete address.
General description	Description of the model so that it is easily identified (model name and number, size etc.)
List of applied standards	Applied measurement standards (harmonised standards and/or other standards).
Identification and signature of the person empowered to bind the supplier	Name and signature of the person responsible for the product.
Model information	Where the information for a model has been obtained by calculation on the basis of design or extrapolation from other equivalent appliances, supply the details of such calculations or extrapolations or both, and of any tests undertaken to verify the accuracy of the calculations. Furthermore a list of all other equivalent models where the information was obtained on the same basis.
Product information <i>Technical parameters should be measured and calculated accordance with Regulation Annex III.</i>	Information and the rounding rules set out in Regulation Annex II Table 3.
Specific precautions	State any specific precautions to encountered when the local space heater is assembled, installed or maintained.
End-of-life information	Information relevant for recycling and/or disposal at end-of-life.

Technical documentation for commercial local space heaters

This guide presents the contents of the Regulations and is addressed to manufacturers, importers and others interested. The guide is not a substitution for the Regulations, and in any case of doubt, the Regulations are applicable. This guide is not legally binding as a binding interpretation can only be made by the EU court.

COMMISSION REGULATION (EU) 2015/1188 of 28 April 2015 implementing Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for local space heaters.

Equivalent product means a product model placed on the market with the same technical and performance characteristics, as another product placed on the market under a different commercial name by the same manufacturer.
